PROFILE

As an Information Technology undergraduate, I seek an internship at a dynamic company where I can apply my knowledge and drive for excellence. With a strong foundation in Information Technology, I bring technical skills, problem-solving abilities, and innovation to the table. My coursework and projects have honed my expertise in web development and app development. I'm committed to contributing to the organization's success while gaining real-world experience. Eager for challenges and collaboration, I'm enthusiastic about becoming an essential part of a company that values innovation and professional growth in the development field.

EDUCATION

BSc.(Hons) in Information Technology

SLIIT Campus - Malabe

2021 Jun - Present

President's College Maharagama

2020

GCE O/L Examination (index : 70254600)

President's College Maharagama

2017

PROJECTS

Restaurant Management System | MERN Stack

'Oracle' Restaurant Management System is a system that has been developed from MERN stack, It consist of fully functional CRUD operations and responsive design. In this system, I created the customer management component, incorporating a secure login system. My proficiency in full-stack development and creative approach contributed to designing a user-friendly customer management module.

"Job Seeker" Android Mobile Application | Kotlin, React.js

'Job Seeker' is an Android application designed as an online job marketplace, built using Kotlin with Firebase as the database backend. This app facilitates job seekers in finding opportunities and allows recruiters to post job vacancies. My role within the project is develop the registration and login systems, ensuring a seamless user experience for application users.

Online Medicine Store | Java

'Medic' is a online medicine store that has been developed from Java. Store owners can add their products to the system, and customers can make purchases using it. My contribution for this system is to create a feedback management system. This allows customers to provide feedback on products, and store owners can access this feedback through MySQL Workbench.

Apartment Advertising Website | HTML, CSS, JS, PHP

'Prime Apartments' is a apartment advertising website that developed from HTML, CSS, JS and PHP. Customers have the ability to view available apartments and submit inquiries using the PHP form. My role in this project is the development of the website's homepage. This included the implementation of animated slideshows and navigation buttons for enhanced user engagement.
